**REFERENCE : RECOMMENDATION OF J.S.G. CORPORATION -
QUARTERPATH ROAD**

Dear Sir:

I have had the pleasure of working with J.S.G. Corporation and recommend them based on the quality of their work, timeliness, ease to work with and integrity. Their work exceeded my expectations. The Run for An Achievable Dream Half Marathon required rebuilding a portion of Quarterpath Road. We needed the road surface repaired and made safe and ready for the marathon athletes. We needed an experienced firm who could work with local government and get our project completed on time. Gary Massie and his staff responded with a plan and approach that was favored by the local government.

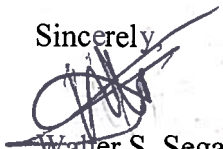

J.S.G. coordinated the repair plan with our management team. J.S.G. met with our team months in advance to discuss the work plan to insure that it was safe for our athletes. The plan met the needs of the athletes who participated in our half marathon and exceeded our expectations. We hosted our first half marathon and this event needed the experience and expertise of J.S.G. Corporation and their staff in order to succeed.

Mike Hubbard supervised and completed the work. During reconstruction J.S.G. Corporation utilized recycled asphalt for a running surface. This surface proved to be excellent for our athletes and retained its surface consistency for the entire race. JSG coordinated the road closure with the City for the repairs and extended that closure through our race event.

J.S.G. Corporation donated their expertise, labor and equipment. An Achievable Dream and Wounded Warriors were the beneficiaries of this donation. J.S.G. Corporation proved that they were committed to their community and their work.

I personally recommend J.S.G. Corporation and will use them again for any commercial work.

Sincerely,

Walter S. Segaloff
Founder and CEO
